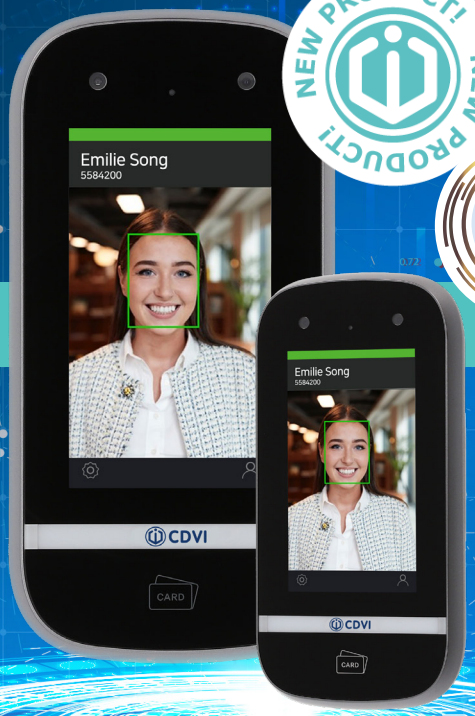
iface™ Facial Recognition

CDVI
Security to Access

iface™

Facial recognition in just 1 second!

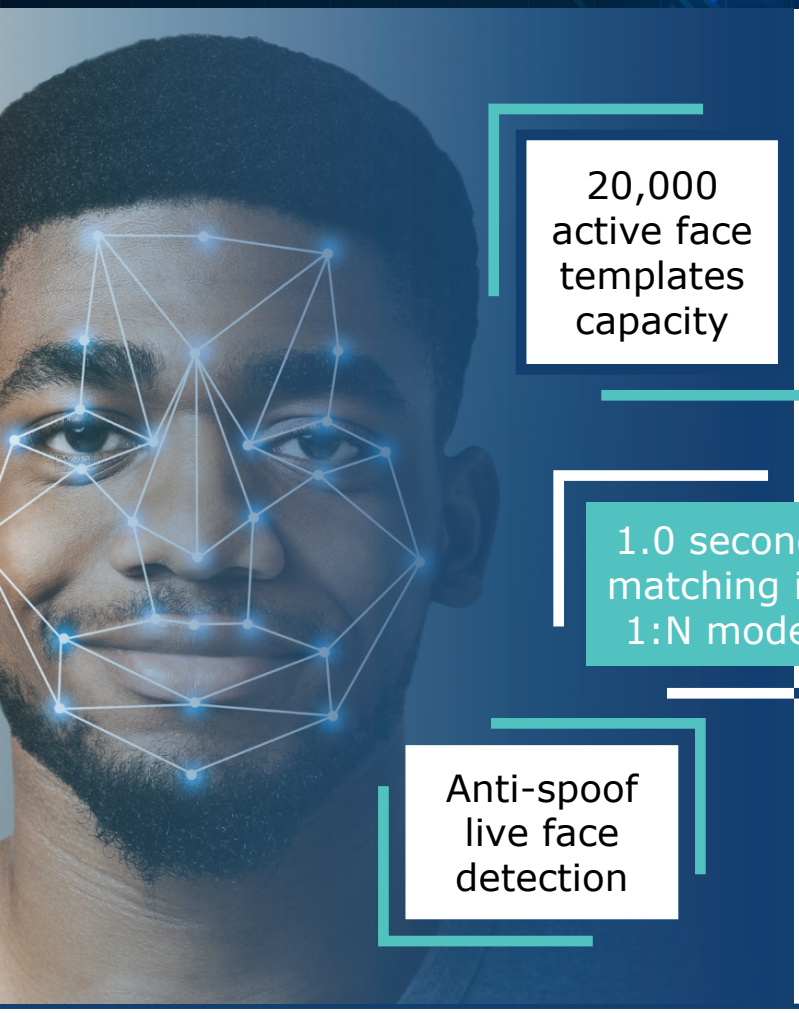


NEW PRODUCT!

5 YEAR WARRANTY

Touch-free access control, instant authentication, and robust data protection - iface™ changes the game for biometric security.

The facial recognition market is projected to treble in size to more than US$11 billion globally by 2026. Security professionals and businesses have already been moving to biometric solutions in droves. Now, COVID-19 has brought facial recognition into its golden era; a fully touchless solution that identifies and verifies individuals in seconds.



Access control integration via Wiegand

Powerful octa-core processor

20,000 active face templates capacity

Built-in MIFARE® DESFire® card reader

Authenticate in 0.3 sec in 1:1 mode

1.0 second matching in 1:N mode

Anti-spoof live face detection

Why choose facial recognition?

iface™ is extremely accurate and extremely fast. There is no access solution more convenient - no more plastic cards and easy to use, even if you're a wheelchair user or carrying heavy boxes.

iface™ means huge wins for efficiency, security, reporting, and a guarantee that only authorised people can gain access.
